# In an uncertain future ...

**Dewhurst** specialises in the design and manufacture of quality products to BS EN ISO 9001.

**Designed to interface** with the most sophisticated electronic systems and building designs, Dewhurst have developed a flexible keypad product with the technology to combat vandalism.

**The attractive** MA range is ideal for those who require secure and vandal resistant solutions - without compromising appearance or design.

**A wide variety of applications** can be accommodated by the Dewhurst keypad including secure access, telecommunications, financial terminals, ticketing, vending machines, transport - in fact anything that requires leading technology protection. There is no limitation to the keypad application - only the imagination!

**Maintenance-free** in brushed stainless steel, the Dewhurst keypad operates in the most severe conditions and gives an extremely long and reliable operational life - offering the best value for money and allowing you to "Fit and Forget".

**Rugged and reliable** design, and a superior finish, offer a combination well suited to both industrial and public environments - setting the Dewhurst keypad apart from any other product on the market.

**Large key characters** and close pitched keys give a positive "click" feel - even when wearing thick gloves.

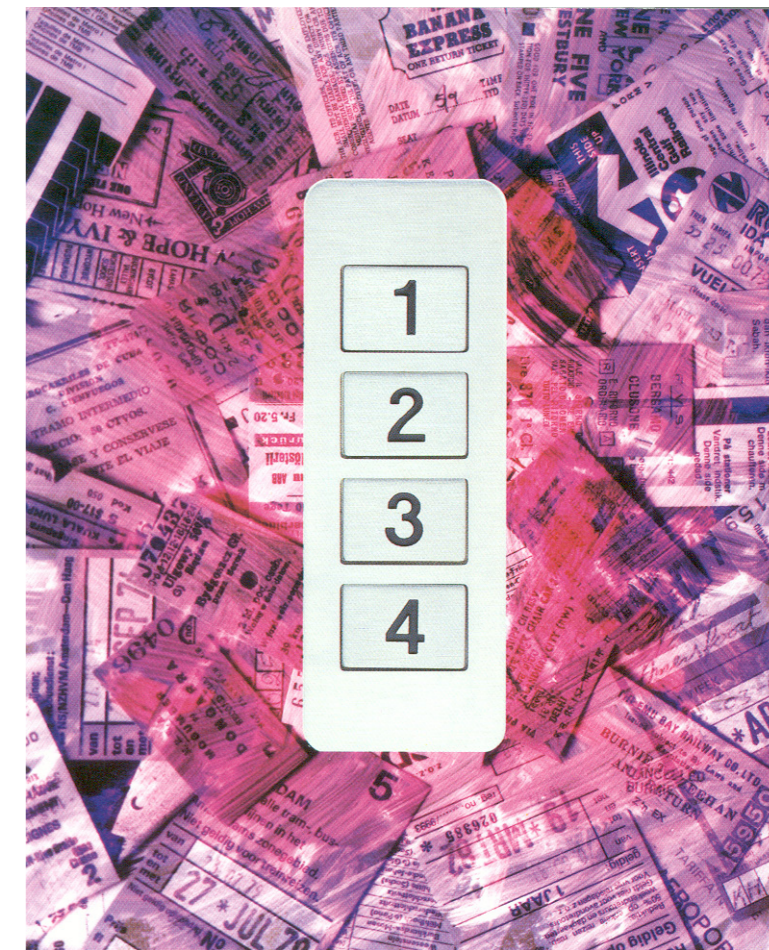

**Customised key legends** and layouts are available to support your specific requirements, and can also be supplied in an extensive range of styles and languages.

**Keypads** can be supplied loose, incorporated into a matching stainless steel panel, or a surface mounted box to complement exterior design.

**Dewhurst offer** a unique design capability. The MA range can be personalised to fulfil your particular design needs. With the largest range of legends and styles, no other product can match the Dewhurst keypad.

**Secure the future** with Dewhurst.

... *the key to success* is the **certain performance** of the **Dewhurst MA range.**
